

- For use on light-duty commercial standard, vertical and high-lift sectional doors
- Ideal for limited height, cathedral or obstructed ceiling installations
- The Protector System® safety sensors reverse the door automatically if the infrared beam is broken, before contact is made
- Cable tension monitor eliminates cable throw
- UL325-2010 compliant
- · Lifetime motor warranty

toughest commercial applications.

APBS

Lift Master

Standard Features

Motor

Heavy-duty 24V DC motor provides ultra-quiet operation, along with variable speed smooth start and stop.

- Rated up to 10 Cycles per Hour
- Push Button Limit Settings
- Compact Design
- Lifetime Motor Warranty
- UL 325-2010 Compliant

Additional Features

- Quick-Connect™ Terminals
 For faster wire installation.
- 6-Foot Power Cord

Makes connecting to a power source easier than ever.

Installation Features

• Wall-Mount Installation

Mounts on the left or right side of door. No rails to hang, the operator simply mounts on the wall and attaches to the door torsion bar. Unit requires an electrical outlet within 6 feet.

Patented Absolute Positioning Technology

The newest technology in commercial door openers. This patented design allows the electronic limits to be extremely accurate, even after a power failure.

Installation Requirements

LiftMast

Commercial Door Operators

- For standard, vertical and high-lift commercial sectional doors with torsion assemblies.
- For doors up to 14 feet high, 18 feet wide or 180 square foot maximum.
- Maximum allowable door weight is 650 lbs.

Standard Accessories

• The Protector System® Safety Sensor
Projects an invisible beam across commercial door
opening. If anything interrupts the beam while the
door is closing, door automatically reverses before
making contact. If beam is obstructed, door will not
close.

Cable Tension Monitor

Cable tension monitor eliminates cable throw and will reverse the door when excessive slack is detected.

APBS Single Button Control Station
 May be used as OPEN and CLOSE with type B2
 control wiring.

Optional Accessories

• Power Door Lock

The lock prevents the door from being manually forced opened once fully closed.

• EverCharge® Standby Power System

During a power failure, the standby power system will operate the door opener for up to 20 full cycles within a 24-hour period.

Alternate Mounting Kit

Allows operator to be mounted below the torsion bar when the torsion bar is not round or the normal mounting area is obstructed.

• Remote Work Light

Add as many lights as required. All lights can be turned on and off by opener activation.
